

# "ATLAZIA" APARTMENTS

## *The Concept*

*...when we first started with the idea of creating a new hostage, we put ourselves in the place of the guest and we have tried to see what would and should be expected of us. Always having this in mind, we designed "ATLAZIA".*

*The apartmentsl was completed in early 2002 in a quiet and colourful street in the end of Alinda bay, close to shops, cafes and restaurants but yet...away from it all.*

*We based the entire architecture of "ATLAZIA" on clean relaxing lines and bright colours, creating a warm homelike environment. A vibrant, natural and sophisticated getaway, with pure authentic materials.*

*Simplicity and luxury have been combined to create 7 stylish apartments which offer absolute relaxation and comfort.*

*"ATLAZIA" has an eco-friendly concept. Asian teak, wood and stone products form an harmonious setting and are some of the materials that we have used in order to bring the calm of nature. New technologies, organic architectural elements, modern alternative materials have been used in order to create a structure which would be respective of the environment.*

*Savour a delicious breakfast in your apartment balcony, continue with coffee, snacks and later enjoy lounging on the comfortable sofas while reading your book and tasting refreshing cocktails.*

*For whatever reason you are with us our intimate patio is there to offer you peace if you decide to work under the sun or stars and pleasant moments with your family, friends or colleagues. Let us even plan a special event- with you for you, in the barbecue of "ATLAZIA".*

*"ATLAZIA"- Enjoy the design.*
